EDUCATION

University of Wisconsin-Madison **Sep. 2025 – Present**

B.S. Mechanical Engineering, May 2029 Anticipated *Madison, WI*

EXPERIENCE

Mechanical Engineering Intern **Jun. 2026 – Aug. 2026**

AprilAire *Sun Prairie, WI*

- Diagnosed root cause of motor failures in zone dampers, driving a design change projected to recover $100K+/year in losses.
- Resolved a recurring quality defect in barometric dampers that cost $20K+/year in lost sales to competitors.
- Designed a live angular displacement measurement tool (±0.1° accuracy), improving product testing speed and reliability.
- Redesigned the dehumidifier sizing map using ASHRAE climate data, giving customers a clearer selection tool and supporting marketing efforts.
- Identified that an oversimplified EPR (Extended Producer Responsibility) calculation method could cause under or over reporting up to 22%.

Mechanisms Lead **Jan. 2026 – Present**

Wisconsin Autonomous Underwater Vehicles (WAUV) *Madison, WI*

- Leading the design, prototyping, and testing of various gripper mechanism, torpedo launcher, and tag dropper designs.
- Collaborating with other team leaders to ensure proper integration of external mechanisms with main AUV chassis.

Design Engineer **Sep. 2026 – Present**

Wisconsin Aerospace (SAE Aero UW) *Madison, WI*

- Ownership of design, truss optimization, and manufacture of structural members of aircraft.
- Analysis of aerodynamic load cases on tail and use of FEA simulation to optimize tail boom design.

Student Custodian **Aug. 2025 – Nov. 2025**

University Housing, UW-Madison *Madison, WI*

- Worked with custodial staff team to clean public lounge spaces and restrooms across three residence halls.
- Organized storage rooms to ensure efficient replacement of appliances that need maintenance.
- Assisted with student move-in by lofting beds and fulfilling maintenance requests.

TECHNICAL SKILLS

Engineering Skills: SolidWorks, Onshape, FEA, Windchill, FMEA, Excel, Arduino, Soldering, 3D Printing

Languages: Python, C++, Java, Bash, Git, JavaScript, Lua
